

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. The improvement of my family dinner and evening time as well as our time on the weekends has greatly improved. We are not interrupted while eating or while doing things with my children like bathtime, story time and play time. Our family time is very precious and I don't want it interrupted. Going from 4-7 calls a night to maybe 1 or 2 has greatly pleased me as well as my children.
